

# BATTERY POWERED LED LIGHT STRIP INSTALLATION GUIDE

## FUNCTIONALITY

- Unlatch the battery box using the two latches on the side the battery box and insert 3 AA batteries (not included), close and latch.
- Before installation, check that the light strip is working as intended, to check...
- push the button once for the 5 minute auto shut off*
- twice for constant on*
- push three times for OFF*

## INSTALLATION

- Thoroughly clean area where the power box and LED light strip is to be attached with rubbing alcohol before installation (see Figure 1).
- Peel the protective layer from the 3M adhesive strip and attach to desired surface, it is best to start removing the protective layer at the end of the light strip away from the power box (see Figure 2).
- Firmly press the power box and light strip to secure into place, it is suggested to mount the light strip by starting from the middle and working outward.

**IMPORTANT:** Battery Powered LED Light Strip adheres best when temperature is between 60°F - 100°F.

## WARRANTY

- Battery Operated LED Light Strip is warrantied against manufacturer defects for 90 days.
