

REPLACEMENT SET SCREW BOLTS FOR GOOSENECKS

INSTALLATION

- A fresh new pair of 3/4" set screw locking bolts is highly recommended to prevent your Shocker Gooseneck Surge from unwanted rotation in the neck of the trailer.
- Remove and replace existing bolts and jam-nuts. Thread new jam-nut(s) onto new bolt(s) and insert into neck of gooseneck trailer.
- Torque/tighten new bolt(s) to 125 ft/lbs, finish by tightening jam-nut(s) to maintain torque.

THANK YOU FOR CHOOSING SHOCKER HITCH
