

-INSTALLATION

- Take provided bolt and slide the lock washer followed by the regular washer over the bolt threads (see Figure 1).
- Insert the bolt assembly through desired adjustment hole and hand thread the bolt assembly into the shackle threads. Repeat on the other side (see Figure 2).
- Take a wrench with a 1" socket or equivalent and tighten both bolt assemblies until the lock washer activates and is snug to the hitch frame (see Figures 3 & 4).

RATED FOR 5-TONS

Figure 1: Slide lock washer, regular washer, onto bolt

Figure 2: Insert bolt assembly and thread into shackle

Figure 3: Tighten until lock washer activates - and snug

Figure 4: Be sure that lock washer is activated.
